

See Your Company Thrive Behind a Unified Front.

Unified Communications is the next evolution of the IP network. The convergence of voice, data and video networks has paved the way for the convergence and integration of multiple communications vehicles that support collaboration, improve communication and increase productivity for your workforce.

N'compass can help your company make Unified Communications a reality. We understand the voice systems, network infrastructure and business processes that are impacted by a UC implementation and know how to successfully implement this technology. Our business analysts and technical architects ensure that all components are considered and a comprehensive migration plan is developed for your company to implement the right unified communications solution.

We understand the benefits of a converged network—from increased efficiency to improved mobility for your highly technical, diverse and mobile workforce. Unified Communications is the next evolution of the converged network, and N'compass has the voice system experts, network infrastructure designers, and business process analysts to successfully implement this emerging technology.

Benefits

- We leverage our knowledge of voice systems, LAN/WAN infrastructures and business process improvements to successfully implement unified communications
- We know the technology and can guide your company to the best unified communications solution for your business
- Our independent consulting services ensure your path to unified communications is unbiased and direct
- We know the technology landscape—from manufacturers to vendors to carriers
- We have a proven end-to-end process methodology that starts with an in-depth Assessment and ends with System Acceptance
- We have extensive experience with multiple markets including retail, health care, manufacturing, energy, financial, higher education, state and local government, and professional services companies
- Your team benefits from our experience of working with early adopters of this technology
- Our client and project-focused team gets the job done so you can focus on your next big initiative
