

FOR IMMEDIATE RELEASE:

With Big-Data Growth, N'compass Names New CEO, President

Minneapolis, MN— February 11, 2016 – N'compass Technologies, LLC. (N'compass) announced today changes to its leadership team to position the company for accelerated revenue growth and development of its big data software platform, currently called LIVE. Effective immediately, Lonnie Bloomquist will assume the role of Chief Executive Officer and Christopher Pinc has been named President.

As CEO, Bloomquist will own the long-term strategic vision with a focus on financial health, sales growth, and investor management. In his role, he will also serve as the company's main interface between internal operations and external stakeholders.

Bloomquist has more than 30 years of diverse experience in the information and communications industries. His extensive entrepreneurial background includes implementation of effective business strategies, as well as executive, organizational, and operational consulting. Bloomquist is currently Chairman of the Board and CEO for EdgeData and Hunter's Management Group and has held a variety of roles throughout his career including CEO, Chief Technology Officer (CTO), and Chief Information Officer (CIO).

"N'compass has an extraordinary opportunity to expand its role in the big data market space with its unique approach," said Bloomquist. "I'm excited to join the team at such a pivotal point in the company's development. I look forward to helping the company succeed as we continue to increase the LIVE Platform's capabilities and user base."

Pinc is a founding partner of N'compass and led the vision for its recent strategic transition to a software company. As President, Pinc will continue to oversee the company's big data vision and software platform development team. In addition, Pinc will manage the daily operations of the company, implementing its long-term strategic plan. Pinc has a bachelor's degree in corporate finance and has held positions as Chief Technology Officer (CTO), Chief Visionary Officer (CVO,) and senior technical consultant.

According to Pinc, "We are at a stage in the lifecycle of our business where we are expanding our software platform, associated technologies, and services into new markets. It is an exciting time and we are preparing for a bright future. With Lonnie on the team as CEO, we will be able to leverage his business acumen and experience to achieve our goals."

In addition to a new CEO and President, N'compass has initiated a search for a VP of Sales. Expansion of the company's software development team is also a hiring focus for 2016.

About N'compass Technologies, LLC

N'compass Technologies, LLC is a Minneapolis-based software and services company committed to bringing “big data” benefits to organizations of all sizes. Businesses realize the potential of data-driven insight, but need straightforward, affordable solutions to achieve that insight. N'compass' LIVE Platform collects the right data, and then provides analytics and business intelligence to help organizations identify weaknesses, spot trends, make informed decisions, and identify new business opportunities.

Currently, the LIVE Platform powers the company's LiveDC and LiveDC: COLO software products. In addition, N'compass offers advisory Service via Software solutions using the platform. Other use cases for the platform are in progress in the fields of medicine, research and agriculture.
